Sweat shop labour

A "sweatshop" is defined by the US Department of Labor as a factory that violates 2 or more labor laws. Sweatshops often have poor working conditions, unfair wages, unreasonable hours, child labor, and a lack of benefits for workers. Take a stand and protest: Ask your school to make its apparel under fair conditions.

+ (OBJECT PRONOUN) **from verb+ing** (something)

**to avoid** (OBJECT PRONOUN) **verb+ing + object.**

While similar, the verbs **avoid** and **prevent** are not the same idea. To **avoid** is to not go near something that is currently happening. To **prevent** is to stop something from existing or happening altogether.

- prevent** = to stop something from happening or someone from doing something:
- avoid** = to stay away from someone or something.

However, if you *avoid doing* something, this can be more or less synonymous with *preventing* it. Example:

Most workplace accidents can be **avoided/prevented** with proper safety training.

Think of this use of *avoid* as metaphorically "dodging" a situation. If you can *avoid* the conditions where something can happen (or avoid being in that situation at all) you have effectively *prevented* it from happening
